Verse

1, When you write a paragraph, make sure you indent
That means leave a space before the first word of your paragraph

2, Write a topic sentence, make your topic sentence
tell what the whole paragraph's about

3, Now you write your body, make sure you write neatly
Detail, detail, detail, detail, detail, that's 5 details

4, Write a closing sentence, finish it off sweetly
Seven sentences or more, will give your paragraph a nice feel

Bridge

Make sure it's tight

Proofread your work
Make sure its right
And at the end of each sentence please, make sure you have an end mark
